INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2004/000039

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-22	YES
	Claims	NO
Inventive step (IS)	Claims 1-22	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-22	YES
	Claims	NO

2. Citations and explanations (Rule 70.7)

The invention concerns an in-line dispenser for adding a dispersible solid to a flow of liquid of the type where a proportion of the flow passing through a permeable conduit enters a surrounding compartment and leaves it again to form part of the flow, carrying with it dissolved or suspended solid from the compartment.

The closest prior art, that of DE 2604213 discloses a dispenser of the above type.

The invention defined by the amended claims of the present application however defines a further feature, ie that the permeable conduit of the dispenser includes a flow restriction that increases turbulence and/or provides a pressure difference in the liquid flow. It is considered that the inclusion of such a feature in a dispenser of the above type is not obvious and that the invention of the amended claims is thereby novel and includes an inventive step.
